ZIGGITY'S WATERING SYSTEM

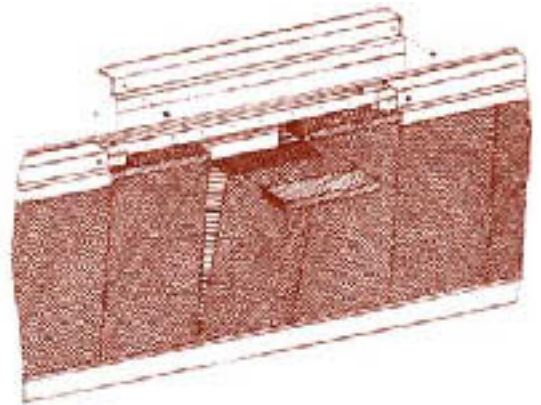

Twin Lock 2-Stage Drinker
The 2-Stage Drinker comes standard on all floor systems. It provides two flow rates, one for smaller birds and one for larger birds, optimizing overall bird performance.

Ziggity's Automatic Flush System comes standard with the Big Ace system. This revolutionary patented system let you flush an entire 500ft building in just 20 minutes, saving time and money.

Ziggity's cost-efficient Mini Star supplemental waterer helps the smaller chicks survive the crucial first-week period by providing additional water. The Mini Star easily snaps onto the Big Ace pipe. And it requires only 4-6 units per 1000 birds.

Movable profile which can be easily taken off for inspection, maintenance or replacement of cooling pad and or water distribution pipe.

Advanced technology ventilation = highest results with minimum energy uptake.
